### **Maintenance Plan**

The PlanRVA “Flood Aware” informational webpage and “Flood Risk Mapper” provide valuable resources for residents and business owners of the region to assess their property flood risk and access tools for flood planning, preparation, and recovery. These resources include details on flood insurance, FEMA Flood Insurance Rate Maps (FIRMs), and safety tips. Maintaining and updating these sites bi-annually is a part of our agency work program.

Data and analysis created from the Resilience Plans funded by the Community Flood Preparedness Fund (CFPF) will be integrated into the Flood Aware webpage and Flood Risk Mapper. This new content will enhance public awareness of flood risks and safety. After CFPF updates are incorporated, regular maintenance will continue under the existing work program.
